

Learning Facilitators' Form

Name of client: _____

As this is a personal journey, most people decide not to have someone with them when they attend the Lightning Process course. However, it is a decision for you to make as to whether you wish to bring a family member or friend with you. If you do choose this, we have found that the kinds of qualities ideal for someone who attends to support you in your learning are to be fully supportive, positive and inspiring.

Please think carefully about the person you would like to bring because although someone cares deeply about you and your future, it does not necessarily mean that they are the best person to help you learn what you need from the seminar.

If you do choose to bring someone please ask them to fill in the following form, so we can help you decide whether they are the best person to support you in your learning and if it is appropriate for them to attend with you.

Please ask them to complete the required details below and to read and sign the conditions.

About the Lightning Process Course

The Lightning Process[®] is a training programme, not a treatment or a therapy so your student needs to be ready to learn. Our experience is that if people apply the skills/tools that they learn from doing this course, then they are able to make changes to achieve new levels of health, wellbeing and happiness.

The Lightning Process is all about your student and their future. As it is their future, they will have the biggest role to play during the seminar, will have to do the most work and be very determined. This is why we recommend that they have more of a

commitment to the training and success than just 'wanting to give it a go'. Having said that, they will not be alone on their journey, their practitioner will be there for them before, during and after the course to help them to keep putting the Lightning Process into practise.

The Lightning Process is an empowering training programme which teaches you and your student how they can influence their health and life using techniques based on the way the brain and body interact. It involves specific steps using movement, posture and coaching which can be tailored to the abilities of the individual if needed.

The course usually takes place in small groups and is carried out over 3 consecutive days. Each day is approximately 3-5 hours including breaks.
